

DAVID MARTINEZ

DevOps Engineer

david.martinez@email.com | (617) 555-0142 | Boston, MA

LinkedIn: [linkedin.com/in/davidmartinez-devops](https://www.linkedin.com/in/davidmartinez-devops)

SUMMARY

DevOps engineer with 5 years of experience building and maintaining cloud infrastructure. Specialized in AWS, Kubernetes, and infrastructure automation. Strong focus on reliability, security, and cost optimization.

CORE SKILLS

Cloud Platforms: AWS (EC2, ECS, EKS, S3, RDS, Lambda, CloudFormation), GCP (basic)

Containers & Orchestration: Docker, Kubernetes, Helm, Amazon ECS

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD: GitHub Actions, GitLab CI, Jenkins, ArgoCD

Monitoring: Prometheus, Grafana, ELK Stack, Datadog, CloudWatch

Scripting: Python, Bash, PowerShell

Networking: VPC, Load Balancers, Route53, Cloudflare

Security: IAM, Security Groups, Secrets Manager, Vault

PROFESSIONAL EXPERIENCE

DevOps Engineer | InfraCloud Inc. | Boston, MA

February 2021 - Present

- Manage AWS infrastructure for SaaS platform serving 100K+ users
- Designed and implemented Kubernetes clusters on EKS reducing deployment time by 60%
- Built Terraform modules for infrastructure provisioning achieving 100% infrastructure-as-code
- Implemented GitOps workflow using ArgoCD for automated deployments
- Set up comprehensive monitoring with Prometheus and Grafana reducing MTTR by 45%
- Optimized AWS costs saving \$8K/month through rightsizing and reserved instances
- Automated backup and disaster recovery procedures achieving RPO <1 hour
- Participated in on-call rotation maintaining 99.95% uptime SLA

Site Reliability Engineer | CloudTech Solutions | Cambridge, MA

July 2019 - January 2021

- Built CI/CD pipelines using GitHub Actions automating testing and deployment
- Configured and maintained Kubernetes clusters for microservices architecture
- Implemented infrastructure monitoring and alerting reducing incident response time by 50%
- Wrote Python scripts for automation of routine operations tasks
- Collaborated with development team on container optimization and best practices
- Managed PostgreSQL databases including backups, replication, and performance tuning

Junior Systems Administrator | TechStartup Inc. | Boston, MA

June 2018 - June 2019

- Maintained Linux servers and performed system updates
- Assisted with AWS infrastructure setup and configuration
- Created deployment scripts using Bash and Python
- Monitored system performance and responded to alerts
- Documented procedures and runbooks

EDUCATION

Bachelor of Science in Information Technology | Boston University | 2018

GPA: 3.6/4.0

CERTIFICATIONS

- AWS Certified Solutions Architect - Professional (2023)
- Certified Kubernetes Administrator (CKA) (2022)
- HashiCorp Certified: Terraform Associate (2021)
- AWS Certified SysOps Administrator - Associate (2020)

PROJECTS

- Open Source: Contributed to Terraform AWS modules (50+ GitHub stars)
- Homelab: Self-hosted Kubernetes cluster running Pi-hole, Plex, and monitoring stack
 - Blog: Technical articles on DevOps practices (medium.com/@davidmartinez)

ADDITIONAL

- Regular speaker at Boston DevOps meetup
- Active in DevOps Slack communities and forums
- Stay current with cloud-native technologies and CNCF projects
