

# EMILY NGUYEN

QA Engineer

emily.nguyen@email.com | (512) 555-0156 | Austin, TX

**LinkedIn:** [linkedin.com/in/emilynguyen](https://www.linkedin.com/in/emilynguyen) | **GitHub:** [github.com/enguyen-qa](https://github.com/enguyen-qa)

## OBJECTIVE

Detail-oriented QA engineer with 1.5 years of experience in test automation and manual testing. Seeking to contribute strong analytical skills and passion for quality to a growing engineering team.

## SKILLS

Testing: Manual Testing, Test Automation, Regression Testing, Smoke Testing, API Testing

Automation: Selenium WebDriver, Cypress (basic), Playwright (learning)

Languages: Python, JavaScript (basic)

Tools: Postman, Jira, TestRail, Git, VS Code

Methodologies: Agile, Scrum, Test-Driven Development (basic understanding)

Databases: SQL queries (basic), PostgreSQL

## EXPERIENCE

### QA Engineer | QualityFirst Software | Austin, TX

*September 2022 - Present*

- Execute manual test cases for web application covering functional and UI testing
- Create and maintain automated test scripts using Selenium and Python
- Perform API testing using Postman and validate response data
- Report and track bugs in Jira with detailed reproduction steps
- Participate in sprint planning and provide testing estimates
- Collaborate with developers to understand new features and edge cases
- Achieved 90% test automation coverage for critical user flows

### QA Intern | StartupTech | Austin, TX

*May 2022 - August 2022*

- Assisted QA team with manual testing of web and mobile applications
- Wrote test cases based on requirements and user stories
- Performed exploratory testing to identify edge cases

- Documented bugs with screenshots and detailed descriptions
- Learned Selenium basics and created first automated test scripts
- Participated in daily standups and sprint retrospectives

## **EDUCATION**

**Bachelor of Science in Computer Science | University of Texas at Austin | 2022**

**Minor: Information Systems | GPA: 3.5/4.0**

Relevant Coursework: Software Testing, Database Systems, Web Development

## **PROJECTS**

- Personal Project: Built automated test suite for e-commerce demo site using Cypress
- Capstone: Developed testing framework for university course registration system
- Completed online course: "Test Automation University" by AppliTools

## **CERTIFICATIONS**

- ISTQB Certified Tester Foundation Level (CTFL) - 2023

## **ADDITIONAL INFORMATION**

- Active member of Austin QA meetup group
- Learning Playwright and exploring performance testing with K6
- Familiar with CI/CD concepts through GitHub Actions exposure
- Strong attention to detail and methodical approach to testing
